

Github遇到Permanently added the RSA host key for IP address '192.30.252.128' to the list of known host - CSDN博客

刚开始使用github的时候不是很了解，新手一般的都会遇到这个问题Permanently added the RSA host key for IP address '192.30.252.128' to the list of known hosts。其实这只是一个警告无伤大雅，继续用就是了，但是看着就是不爽，然后就想办法把他KO，一招致命。

出现的问题如下图：

```
zhuxy@Ubuntu1204:/opt$ cd github
zhuxy@Ubuntu1204:/opt/github$ git clone git@github.com:sunseazhu/cryptdb.git
Cloning into 'cryptdb'...
Warning: Permanently added the RSA host key for IP address '192.30.252.128' to the list of known hosts.
remote: Counting objects: 1558, done.
remote: Total 1558 (delta 0), reused 0 (delta 0), pack-reused 1558
Receiving objects: 100% (1558/1558), 38.18 MiB | 65 KiB/s, done.
Resolving deltas: 100% (173/173), done.
```

上述那条警告的大概意思就是：警告：为IP地址192.30.252.128的主机（RSA连接的）持久添加到hosts文件中，那就来添加吧！

解决办法：

```
vim /etc/hosts
```

添加一行：192.30.252.128 github.com

效果如图：

```
zhuxy@Ubuntu1204:~$ sudo vim /etc/hosts
[sudo] password for zhuxy:
zhuxy@Ubuntu1204:~$ cat /etc/hosts
127.0.0.1    localhost
127.0.1.1    Ubuntu1204
192.30.252.128 github.com
# The following lines are desirable for IPv6 capable hosts
::1    ip6-localhost ip6-loopback
fe00::0 ip6-localnet
ff00::0 ip6-mcastprefix
ff02::1 ip6-allnodes
ff02::2 ip6-allrouters
zhuxy@Ubuntu1204:~$
```

这样就可以了，测试如图：

```
Resolving deltas: 100% (173/173), done.
zhuxy@Ubuntu1204:/opt/github$ git clone git@github.com:sunseazhu/test.git
Cloning into 'test'...
remote: Counting objects: 16, done.
remote: Total 16 (delta 0), reused 0 (delta 0), pack-reused 16
Receiving objects: 100% (16/16), 5.21 KiB, done.
Resolving deltas: 100% (4/4), done.
```

此时那个警告就没有了。
