weblogic启动报错 - _GOD - 博客园

重启了一次linux服务器后，weblogic启动莫名报错，查看日志发现说部署的项目有个bean类无法加载，

1、然后手动删除 已经部署的项目，先在

domais/servers/AdminServer/upload

删除上传的项目；启动报错

复制代码

```
13, 201610:01:47 AM CST>   149605> for AppDeploymentMBean mmp. Error -
weblogic.management.DeploymentException: .weblogic.management.DeploymentException:     at
weblogic.servlet.internal.WarDeploymentFactory.findOrCreateComponentMBeans(WarDeploymentFactory.java:69)
at weblogic.application.internal.MBeanFactoryImpl.findOrCreateComponentMBeans(MBeanFactoryImpl.java:48)
at weblogic.application.internal.MBeanFactoryImpl.createComponentMBeans(MBeanFactoryImpl.java:110)    at
weblogic.application.internal.MBeanFactoryImpl.initializeMBeans(MBeanFactoryImpl.java:76)     at
weblogic.management.deploy.internal.MBeanConverter.createApplicationMBean(MBeanConverter.java:89)
Truncated. see log file for complete stacktraceCaused By: java.util.zip.ZipException: Error opening file
- /domains/borzmmp/servers/AdminServer/upload/mmp.war Message - error in opening zip file     at
weblogic.servlet.utils.WarUtils.existsInWar(WarUtils.java:87)     at

at weblogic.application.internal.MBeanFactoryImpl.createComponentMBeans(MBeanFactoryImpl.java:110)
Truncated. see log file for complete stacktrace>
```

复制代码

2.修改配置文件

/soft/Oracle/Middleware/user_projects/domains/borzmmp/config

此文件内删除以下代码

复制代码

```
    yitong-mmc    AdminServer    war    servers/AdminServer/upload/yitong-mmc.war    DDOnly
```

复制代码

3、启动还报错

复制代码

```
13, 201610:05:22 AM CST>   090087>  13, 201610:05:22 AM CST>   002606> for listening on channel
"Default[2]". The address 127.0.0.1 might be incorrect or another process isusing port 7001:
java.net.BindException: Address already in use.>
```

复制代码

呵呵哒了

原来端口占用了

4、解决端口占用

```
[root@localhost bin]# netstat -apn | grep 7001      tcp       00 :::7001                    :::*
LISTEN      22458/java
```

万千人群中一眼就发现了它，让我瞅下这是个什么鬼

复制代码

```
[root@localhost bin]# ps -aux|grep 22458root         135170.00.0103252840 pts/1    S+   10:100:00 grep
22458root        224580.08.787595561425968 ?       Sl    Jun27   19:09 /usr/java/jdk1.8.0_66/bin/java -
Djava.util.logging.config.file=/root/.IntelliJIdea2016.1/system/tomcat/Unnamed_mmp-

Djava.rmi.server.hostname=127.0.0.1 -Djava.endorsed.dirs=/soft/apache-tomcat-7.0.67/endorsed -classpath
/soft/apache-tomcat-7.0.67/bin/bootstrap.jar:/soft/apache-tomcat-7.0.67/bin/tomcat-juli.jar -
Dcatalina.base=/root/.IntelliJIdea2016.1/system/tomcat/Unnamed_mmp-sdk -Dcatalina.home=/soft/apache-
tomcat-7.0.67 -Djava.io.tmpdir=/soft/apache-tomcat-7.0.67/temp org.apache.catalina.startup.Bootstrap
start
```

复制代码

原来是之前服务器上装了intellij，启动后忘记关掉了。

怒关

kill -9

重启一切正常
